

Stoginiai ventilatoriai

Roof fans

Dachventilatoren

Крышные вентиляторы

Stoginiai ventilatoriai, naudojami oro ištraukimui iš patalpos. Sparnuotė uždengta tinklo grotelėmis, apsaugančiomis ją nuo pašalinių daiktų, galinčių patekti iš aplinkos ir pažeisti sparnuotę mechaniškai. Nenaudojami užteršto oro, agresyvių, sprogių dujų transportavimui.

Sparnuotė: atgal lenktais sparneliais, cinkuoto plieno.

Variklis: išorinis rotorius, tiesioginė pavara, integruota termokontaktinė variklio apsauga, ilgai tarnaujantys nereikalaujantys priežiūros guoliai.

Korpusas: iš cinkuotos skardos.

Dachventilatoren, sie werden für Abluft aus dem Raum verwendet. Laufrad ist mit Netzgrill abgedeckt, der es vor Gegenständen schützt, die aus der Umgebung gelangen und Laufrad mechanisch beschädigen können. Nicht geeignet für die Beförderung von verschmutzter Luft, aggressiven, explosiven Gasen.

Laufrad ist rückwärts gekrümmt, aus verzinktem Stahl.

Der Motor: Außenrotor, Direktantrieb, integrierter Thermokontakt-Motorschutz, dauerhafte, keine Pflege erfordernde Lager.

Das Gehäuse: aus verzinktem Blech.

Roof fans with vertical discharge are used to extract air from different premises. Motorised impeller is protected with a meshwork grill which offers protection against external objects that could cause mechanical damage to the impeller. Not suitable for polluted air, aggressive and explosive gases.

Impeller with backward curved blades made of galvanized steel.

Motor: external rotor, motor protection built-in thermal-contact, free-maintenance ball bearings.

Housing: made of galvanized steel.

Крышные вентиляторы для вытяжки воздуха из помещений. Крыльчатка закрыта сетчатой решёткой, защищающей её от попадающих извне посторонних предметов, способных механически повредить крыльчатку. Не используются при транспортировке загрязнённого воздуха, агрессивных, взрывоопасных газов.

Крыльчатка: загнутые назад лопатки, оцинкованная сталь.

Двигатель: наружный ротор, прямая передача, встроенные термоконтакты двигателя, не требующие ухода подшипники с длительным сроком службы.

Корпус: оцинкованной жести.
